Advanced Oxygen Sensors for Anesthesia

Proprietary Developments...

Enjoy competitive advantages unmatched by competitors.

T90 Response...

Choose your response time without giving up sensor life or increasing dimensions.

Expected Life...

Our technology offers the longest Life and reliability in the industry.

Warranty...

Finally, a realistic warranty based on the 60-70% average oxygen level in normal service. Don't be misled, get the facts.

In-House Production...

The widest range of sensors are "Made in the USA".

Quality...

Our sensors are subject to the most extensive stability testing in the industry: output in air, under 30" WC pressure and at 100% oxygen.

Service and Support...

99.5% of orders ship in 24 hours and our phones are answered by real live customer service reps trained to help you.
