Advanced Oxygen Sensors for Respiratory

Proprietary Developments...

Enjoy competitive advantages
unmatched by competitors.

T90 Response...

Choose your response time without
giving up sensor life or increasing
dimensions.

Expected Life...

Our technology offers the longest
life and reliability in the industry.

Warranty...

A realistic warranty based on
the 60-70% average oxygen
level in normal service. Don't
be misled, get the facts.

In-House Production...

The widest range of sensors are
"Made in the USA".

Quality...

Our sensors are subject to the
most extensive stability testing
in the industry: output in air,
under 30" WC pressure and at
100% oxygen.

Service and Support...

99.5% of orders ship in 24 hours
and our phones are answered by
real live customer service reps
trained to help you.

OMO2+A Analyzer

Distributed by:

Committed to Quality

100% QC Testing... the most extensive testing in the industry provides you with the most reliable O2 sensors possible:

- Extended leak test confirms integrity of seals
- Mandated stabilization period to ensure consistency and reliability
- Pressure tested per ISO 7767
- Cycle from air to 100% to ensure stability and linearity
- Multiple uA and mV sensor output and stability tests during assembly

Advanced Technology...

- Longer life in traditional sizes
- Faster response time without giving up service life
- Proprietary processing designed to minimize internal contamination
- A design that simplifies assembly and enhances quality

Superior Service...

- Speak with real people, trained specifically to help you
- Knowledgeable engineers
- Delivery within 24 hours

Quality...

Our QA Program mandates that every warranty claim be thoroughly investigated and the customer furnished with a complete report.
